KNUCKLE. *n. s.* [knucle, Saxon; *knockle*, Dutch.]  
 1. The joints of the fingers protuberant when the fingers close.  
 Thus often at the Temple-flairs we've seen  
 Two tritons, of a rough athletic mien,  
 Sourly dispute some quarrel of the flood,  
 With *knuckles* bruised, and face befear'd in blood. *Garth.*  
 2. The knee joint of a calf.  
 We find also that Scotch skinck, which is a pottage of strong nourishment, is made with the knees and finews of beef, but long boiled: jelly also, which they used for a restorative, is chiefly made of *knuckles* of veal. *Bacon's Nat. Hist.*  
 3. The articulation or joint of a plant.  
 Divers herbs have joints or *knuckles*, as it were stops in their germination; as gillyflowers, pinks, fennel, and corn. *Bacon's Natural History.*  
 To KNUCKLE. *v. n.* [from the noun.] To submit: I suppose from an odd custom of striking the under side of the table with the *knuckles*, in confession of an argumental defeat.  
 KNUCKLED. *adj.* [from *knuckle*.] Jointed.

the water: it hath these properties, that it is hollow, and it is *knuckled* both stalk and root; that, being dry, it is more hard and fragile than other wood; that it putteth forth no boughs, though many stalks out of one root. *Bacon's Nat. History.*  
 KNUFF. *n. s.* [perhaps corrupted from *knave*, or the same with *chuff*.] A lout. An old word preserved in a rhyme of prediction.  
 The country *knuffs*, Hob, Dick, and Hick,  
 With clubs and clouted shoon,  
 Shall fill up Duffendale  
 With slaughtered bodies soon. *Hayward.*

 The stony nodules found lodged in the strata, are called by the workmen *knurs* and knots. *Woodward's Met. Geol.*

 To KYD. *v. n.* [corrupted probably from *cuð*, Saxon.] To know.  
 But ah, un'ust and worthless Colin Clout,  
 That *kyd* the hidden kinds of many a weed;  
 Yet *kyd* not one to cure thy fore heart root,  
 Whole rankling wound as yet doth risily bleed. *Spenser.*
